FOOD PACKAGING CREATIVITY

SINCE 1937

An aerial photograph of a lush green forest. A dark blue river winds through the trees, forming a large loop that encircles a central island. The island is also covered in dense green trees. The overall scene is vibrant and natural.

VISION

To be the global leader in niche, added-value food packaging solutions, underpinned by our innovation, quality, responsiveness to customer needs and green credentials.

MISSION

To provide a comprehensive range of innovative food packaging solutions to customers around the world, working to exacting manufacturing standards in terms of quality, health and safety, hygiene, customer service and the environment.

All our paperboard material is purchased from managed forests, in line with EU Timber Regulation (EUTR).

ABOUT US

NOW

Today, we design and manufacture creative, environmentally friendly packaging products for the food service and food processor market sectors.

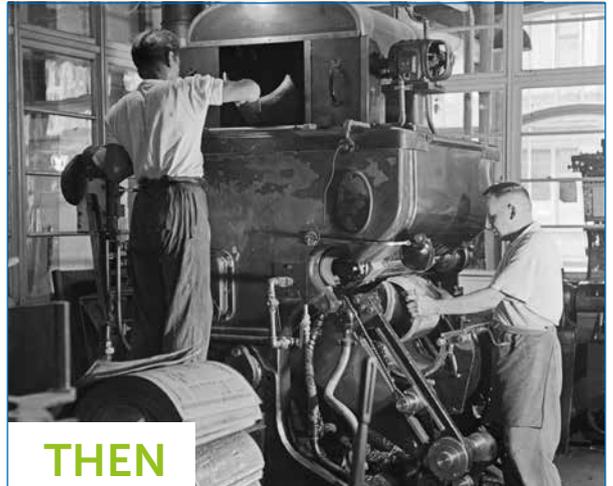

Operating out of three sites in the county of Bedfordshire, close to London, we export our products to over 60 countries world wide, winning business based on our:

- **market expertise built on customer relationships, materials and process knowledge;**
- **innovative designs, supported by over 180 patents, trademarks and registered designs.**

WE STOCK AND SELL OVER 500 PRODUCTS AND MANUFACTURE MORE THAN 2,500 DIFFERENT PRODUCTS EVERY YEAR.

Our international activities enhance our proposition, identifying new opportunities and challenges on which we base new product technologies and designs. These developments encompass new menus, ways of eating and serving food, as well as addressing environmental and food shelf life and waste issues.

We utilise a multilingual and culturally sensitive sales and marketing team to represent our ranges internationally. We approach each country's market individually and pragmatically, adapting to local needs, regulatory regimes and food cultures. This approach, alongside a highly motivated and skilled team has enabled Colpac to reach markets as diverse as North America, Australia, China, Middle East and the CIS.

THEN

The Company started out as a trader in 1937, importing straw board from Holland, selling the raw material to the hat trade in Luton.

After the end of WW2, the Company started to convert the imported raw material sheets into finished hat boxes using its own machinery. In view of the limitations of the hat trade, the Company sought new markets in the engineering and fashion sectors, which were expanding in the 1950's. From there, development went into the toys and games market making the rigid boxes for the first edition of Trivial Pursuit. This led to investment into new types of machinery, prompting further investment into printing machinery to enhance the brand offerings of the Company's specialist products.

The catalyst for significant change in the Company's direction came with the establishment of the first McDonalds restaurant in the UK in the mid 1970's. This marked and corresponded with a massive change in consumer eating habits, which had immediate benefits for the foodservice supply chain, particularly food packaging manufacturing. The Company entered the market with six new products, took a stand at the first Fast Food Show in Brighton in the late 70s, and never looked back.

Food wastage and the environment dominate so much of today's and tomorrow's thinking. As a supplier, we will continue to provide innovative solutions to meet the challenges of what can only be described as a packaging revolution.

I am proud to be at the helm of an independent, private company that has played a key role in this sector and continues to fly the flag for British design and manufacturing.

Neil Goldman
Managing Director

COLPAC IN PICTURES

OUR SERVICES

HOW WE CAN WORK TOGETHER

Our dedicated, in-house design and marketing team carries out extensive research to stay up to date with evolving food packaging trends and food market analysis around the world.

Through our wealth of experience, and our ability to manage the entire production process under one roof, we encourage our customers to utilise our knowledge, ensuring they receive the best possible solution to meet their objectives. Through our skilled team we get to know a company's brand and create packaging which not only underpins this but adds value.

Our "Under One Roof" approach

CUSTOM MADE

CUSTOM MADE

The product can be customised to your design/artwork.

OUR PACK, YOUR DESIGN!

Our in-house graphics and construction team specialise in packaging design and brings your products to life with individual customised solutions.

OUR MATERIALS

Our team is extremely knowledgeable in paperboard and, through this expertise, we frequently test different board materials with food products to ensure that we provide our customers with the exact solution to meet their needs.

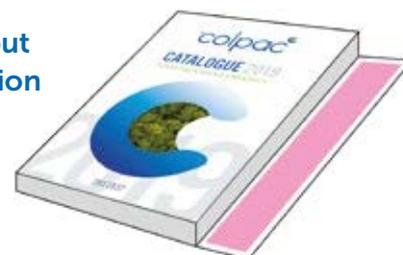

COMPOSTABLE (EN 13432 STANDARD)	RECYCLABLE	MADE FROM RECYCLED MATERIALS	COMPOSTABLE DUAL OVENABLE	KRAFT NATURAL AND AUTHENTIC
LAMINATED	MATT, GLOSS OR HIGH-GLOSS UV FINISH	WHITE CRISP AND CLEAN APPEARANCE	COATED BOARD SMOOTH TO THE TOUCH	UNCOATED BOARD NATURAL/ ROUGHER TO THE TOUCH
FSC® CERTIFIED BOARD (FSC® C041147)	COMBINATION PACKAGING PAPERBOARD AND PLASTIC COMBINED	PERFORATED FILM	ANTI MIST WINDOW OR LID	PEFC™ CERTIFIED BOARD
FREEZER SAFE	GREASE RESISTANT	GOOD WET STRENGTH	HARD SIZED (TO REDUCE ABSORBENCY OF BOARD)	SUITABLE FOR MODIFIED ATMOSPHERE PACKAGING (M.A.P.)
SUITABLE FOR HOT FILL	SUITABLE FOR HOT CABINET	SUITABLE FOR MICROWAVE & OVEN	HEAT SEALABLE	HEAT SEALABLE FILM

In order for us to recommend the best material, we take into consideration the intended application, including elements such as logistics, retailer needs, and consumer preferences.

ICONS

You will find these icons throughout our catalogue, providing information on the materials of each item.

You will also find the icon key on the fold out section at the back of this catalogue.

KEY ▶

COMPOSTABLE

The materials in these products are industrially compostable within 90 days (EN 13432 standard).

COMPOSTABLE (16 WEEKS)

The materials in these products are industrially compostable within 16 weeks.

COMPOSTABLE WINDOW

The film material used for these windows is industrially compostable within 90 days (EN 13432 standard).

RECYCLABLE

The plastic lids/window films used for these products are recyclable.

RECYCLED LID

The lids for these products are made from recycled plastic material (rPET).

RECYCLABLE BOARD

The board for these products is recyclable.

RECYCLED BOARD

The board for these products is made from recycled material.

SUITABLE FOR MICROWAVE

The product is suitable for microwave use.

SUITABLE FOR OVEN

The product is suitable for oven use.

SUITABLE FOR FREEZER

The product is suitable for freezer use.

SHORT SHELF-LIFE

Products with a shorter shelf-life.

LONGER SHELF-LIFE

Product with a longer shelf-life.

EXTENDED SHELF-LIFE

Products with an extended shelf-life.

CUSTOM MADE

The product can be customised to your design/artwork.

Although Colpac makes every reasonable attempt to test its products for a range of typical applications, Colpac cannot control the specific applications for which its products are used. Therefore, it is the customer's responsibility to test the suitability of a Colpac product for the customer's specific application.

OUR COMMITMENT

At Colpac, we are proud of the fact we were one of the first manufacturers of carton board packaging to offer environmentally-friendly products to the food service industry.

As a sustainability-driven business, we recognise the importance of 'where' and 'how' when it comes down to what we produce and which materials we use. That is why we are committed to ensuring that our practices and products continue to complement our green and innovative approach to our marketplace and are integrated with our environmental policies.

**Today, a large proportion of our range is recycled, recyclable or compostable*;
and recyclability is at the centre of our environmental commitment.**

Colpac recognises its responsibilities in relation to the environment, adopting working practices and procedures that minimise any adverse impact on the environment. We encourage all our employees to play their part in enhancing our sustainability efforts and are rigorous in our selection of new suppliers and reassessment of existing ones.

Through continuous monitoring, not relying solely on self assessment, and conducting our own visits to verify ongoing compliance, we are extending our social and environmental commitments into our supply chain.

Folly Wood, Flitwick. Colpac are proud to increase our support of the Wildlife Trusts to investor level in 2019.

CARBON CAPTURE

Colpac are proud to be engaging with the Carbon Capture programme, a unique, market leading, environmental marketing initiative with real tangible benefits.

We are now offering our clients the opportunity to capture the CO₂ emissions from the manufacture and distribution of the material we purchase for our packaging products by planting new native woodland right here in the UK, through the Woodland Trust and the Woodland Carbon scheme.

By opting to Carbon Capture with Colpac, you are helping to create native woodland in the UK providing habitats for wildlife and green spaces for all to enjoy. The Woodland Carbon logo can be used on packaging to enhance, communicate your brand and your environmental values.

The Woodland Trust issue certificates detailing the amount of new native woodland you have helped create and CO₂ captured.

OUR GLOBAL MARKET

Colpac exports products to over 60 countries worldwide and this is reflected in our attendance at major packaging and food service events around the globe.

It is key to our exemplary customer service to remain well informed and understand the differing trends that impact each market we are present in. We work with local sales representatives and support our activity through press and social media, shaping our product offering to suit local markets.

SANDWICH PACKS

Our breadth of sandwich packaging options is unrivalled in the market and, as one of the first manufacturers to offer environmentally-friendly products, our range has options that are recyclable and compostable.

Our packs are available in a range of sizes, styles and barrier properties to suit all sandwich packaging requirements. There are finishes for all your requirements from our fully compostable Zest™ Eco-Packaging range to longer shelf-life solutions with our heat sealed and Modified Atmosphere Packaging (MAP).

Key Attributes

- Choice of sizes and loading options
- Range of ecological options including recyclable and fully compostable
- Range of barrier properties to suit all sandwich types
- Short shelf-life for same day consumption to heat sealed and MAP to extend shelf-life
- Custom design to highlight your brand

CHILLED FOOD TO GO

Today the chilled food to go market caters for a wide breadth of food and our packaging solutions are varied to support this. Content visibility to allow the end consumer to view the product is important, as are the barrier properties and closure options that support varying shelf lives and a variety of fillings.

Key Attributes

- Range of materials from recyclable to compostable
- Variety of sizes and styles to suit your chilled food to go requirements
- Sealing options from tuck top for short shelf-life to heat sealed for extended -life
- Range of barrier properties to suit all filling options
- Custom design to highlight your brand

Zest™
ECO-PACKAGING

Our Zest™ salad pack is manufactured from materials that are compostable within 90 days and are EN 13432 certified.

Manufactured in a mono material, Zest™ Eco-Packaging can be recycled as a single unit as the window is plastic free, made from cellulose and GM Free.

TAKE HOME

Today's consumers are time poor and convenience is often still at the heart of purchasing choices.

With the ability to go from freezer to oven or microwave allowing it to cater for all food types, perfect for the ready meal and hot counter retail markets. The Cookpac® range is available in both short shelf-life and longer shelf-life, allowing it to cater for a variety of food types.

GOURMET 24•7™

- ✔ Easy to use
- ✔ Quick to assemble
- ✔ Multi-functional
- ✔ Recyclable
- ✔ Custom made print
- ✔ Microwaveable

Gourmet 24•7™ is made subject to minimum order quantities.

MICROWAVEABLE & OVENABLE

COOKPAC® HEAT-SEAL

ONE-PIECE PAPERBOARD PACK

The Cookpac® range has been specifically developed for the demands of the retail marketplace.

Providing a packaging solution that minimises waste and is fully recyclable, the Cookpac® range caters for short shelf life with the same day range and longer shelf life with the heat sealed range. With the ability to go from freezer to oven or microwave, it caters perfectly for the ready meal and hot counter retail markets.

Key Attributes

- Ovenable up to 210 °C and microwaveable
- Fully recyclable materials
- Single piece design, no separate lid required
- Self venting film available
- Variety of sizes including bespoke for the heat seal range
- Custom design available to highlight your brand

COOKPAC® HEAT-SEAL PACKS ARE MADE TO ORDER.

DELIVERED FOOD

For 2019 we have worked extensively on our delivered food range to make it easier to use for this fast-paced market.

This is a market dominated by single use plastic and our platter ranges provide a much-needed ecological alternative that is practical as well as being fully recyclable.

Key Attributes

- Fully recyclable
- Nestable once constructed allowing for space efficient storage
- Range of sizes to cater for differing party requirements
- Easy open sleeves with locking tabs for security
- Sleeves available with or without window
- Combination platter for maximum visibility
- New cellulose windows recycle easily with board waste - ask for details

MACHINERY

In addition to our packaging expertise we offer a range of packaging machinery, which has been specifically designed for sealing paperboard food packaging.

Our machines range from small counter top machines, for sandwich shops and delicatessens, up to larger production models ideal for higher volume manufacturers, including a unique range of Modified Atmosphere Packaging (M.A.P.) machines for a longer shelf-life.

Choosing the right packaging and sealing machinery may appear difficult but, as part of our service, we carry out machinery training in-house or at your or your customer's site.

We are committed to finding the right packaging solution for you and your customer, as the right machinery can help to increase productivity and efficiency on a production line as well as giving more flexibility.

Talk to our sales team about how we can help.

ColMAP™

The technology of Modified Atmosphere Packaging (M.A.P.) replaces the normal atmosphere with a mix of gases.

The gas mixture inside the packaging depends on the components of the product. Our ColMAP™ machinery is specifically designed to use modified atmosphere with our paperboard packaging.

We can adapt our packaging solutions and our machinery to your special requirements making sure you get the best result for your products.
